

Erikson's Stages of Psychosocial Development

Stage	Ages	What issues concern the child at this stage?			
<i>Stage One</i>	Infancy- 1 year	Trust	versus	Mistrust	If needs are met, child develops a sense of trust
<i>Stage Two</i>	1-2year	Autonomy	versus	Shame	Develops a need to do things for themselves or will doubt their abilities
<i>Stage Three</i>	3-5years	Initiative	versus	Guilt	Initiate and carry out tasks or feel guilty for not being independent (potty training?)
<i>Stage Four</i>	6- adolescenc e	Industry (Competence)	versus	Inferiority	Gain pleasure form applying themselves or feel inferior (Do I have worth?)
<i>Stage Five</i>	Adolescenc e	Identi y	versus	Identity Confusion	Testing roles and integrating to form a single identity or will be confused about self
<i>Stage Six</i>	Young adult	Intimacy	versus	Isolation	Forming close, intimate relationships or feel socially isolated
<i>Stage Seven</i>	Middle adult	Generativity	versus	Stagnation	Develop of sense of contribution to the world or feel lack of purpose
<i>Stage Eight</i>	Late adult	Ego Integrity	versus	Ego Despair	Have I lived a full life? Satisfaction or failure?
