

THE OUTRAGEOUS CELEBRITY

Choose the most outrageous celebrity you can think of; past or present, real or fictional.

Provide a short list of some of the outrageous behaviors this person has exhibited.

Then, attempt to explain these behaviors from the point of view of each major psychology perspective.

Your reasons can be as “ridiculous” as the behavior itself, as long as it falls in line with the perspective. (They don’t have to be true!).

The perspectives you will use are: Biological (neuroscience), Developmental, Cognitive, Psychodynamic, Humanistic, Behavioral, Sociocultural, Trait and Sociobiological (Evolutionary)

Complete a “poster” of the information about your celebrity. Make sure the names of all students in your group is located in the “heading” information on the back of your poster.
